  - UV-curable Led
  - Water
  - Oil
  - Dye-sublimation

Make your own practical test to be sure it reaches your quality standard. For all- and latest information see our Compatibility List.

**Printing guidelines** Max. temperature (material) should not exceed 80°C as overheating can impair the flatness of the media. Ink restrictions and heater settings have to be set for specific printer ink combinations to obtain the best results.

**Colour profiles** AT graphix develops high quality ICC colour profiles for the divers printing media's. We work with specialists that can do profiling for almost every printer - rip combination.

**Storage conditions** 1 year under normal conditions (10. 25°C at a relative humidity of 30. 75 %). Higher humidity and/or temperature can affect the product performance. Always store the media in a dark place.

**Environment** The media and final prints can be disposed of as canvas media. Material is suitable for recycling. Please consult local recycle resources.
